

K913 KINEPOWER

High Compression ankle brace - Injury prevention - Malleolus extra padding

High compression ankle brace that protects the ankle joints and promotes thrust during the execution of the athletic movement. With effective elastic support in interlaced fabric with a PATENTED structure that acts as a neuromuscular proprioceptive tape, improves balance and motor control, reduces the risk of injury or microtrauma to the foot joints and speeds up post-traumatic recovery.

Equipped with shock absorbing malleolar padding, it offers protection and comfort to the impact zones.

* K913 BEIGE is available also in size M
