

# K207 ACHILLES CREW

## Improves stability and protects against injuries - Low cushioning

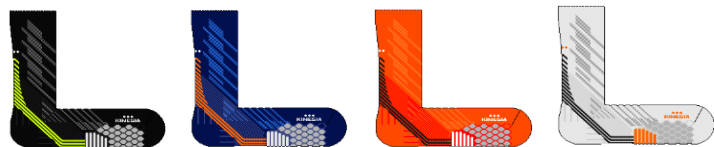

High performance sock designed for competition/training and long duration activities. Promotes venous outflow, increases resistance and improves sports performance. Special integrated Achilles tendon support for ankle-plantar arch support with a **PATENTED** structure that improves motor control and reduces the risk of injury or micro-trauma to the foot joints.

Ventilation panels on the back of the foot to prevent overheating and excessive sweating.

Plantare ammortizzante a bassa densità per massimo assorbimento urti e minimo ingombro. Il rinforzo avampiede a struttura alveolare offre superiore flessibilità e maggiore aderenza all'interno della scarpa.

SUITABLE FOR::  
**RUNNING, CYCLING, SKATING, PARKOUR, FOOTBALL, GOLF...**
